

WOW! BIO-BASED MICROBIAL FLOOR WASH

WOW! Bio-Based Microbial Floor Wash comes in a convenient pre-measured packet and is a neutral pH floor wash that contains stable, cultured strains of microbes capable of digesting complex proteins, starches, fats, oils, greases, vegetable gums, and other organic wastes found on quarry tile and deep in grout in restaurant kitchens. Also excellent in bathrooms, showers, locker rooms, etc. where malodors harbor in the grout lines. Billions of “nonpathogenic” bacteria produce enzymes that eradicate organic waste naturally. Enzymes regenerate the bacteria exponentially, therefore the dirtier the floor the better the product preforms. This product is more economical and efficient in cleaning and brightening tile and grout and other floor surfaces than conventional floor cleaners and degreasers, including those that claim to be “enzymatically” enhanced. Drain and odor control are provided instantaneously as organic sources of malodors are naturally degraded into carbon dioxide and water then rinsed down the drain.

Cleans and Protects On Many Flooring Surfaces:

- Quarry Tile
- Grout
- Glazed Ceramic Tile
- Concrete
- Brick
- Rubber Mats

Works on:

- Complex Proteins
- Starches
- Fats
- Oils and Grease
- Vegetable Gums

Features and Benefits:

- Convenient Pre-measured packets
- Safe to Use
- Reduced Slip/Fall Accidents
- Cleans Tile and Grout
- Eliminates Drain Flies and Drain Line Backups
- Reduced Operational Costs with Huge Savings of Time & Labor

Directions for Use:

1. Add entire packet (both sides) to 4 gallons of water to make solution.
2. Apply liberally onto swept floor surface.
3. Deck brush or machine scrub as needed.
4. Mop dry or rinse, squeegee or wet vacuum dry.
5. Discard mop water down drains to reduce grease build up and eliminate odors.
