- Breaks down and removes scale and soap scum
- Removes white haze caused by efflorescence
- Removes the oxidized and embedded soil from porous grout brightening and renewing the surface of the grout
- Available in gallons for large area applications and in quarts for small area applications

**How to use:** NOTE: Wear chemical resistant gloves, safety goggles, long pants and long sleeves when working with this product.

1. Test product in an inconspicuous area prior to use.
2. For regular maintenance of ceramic tile, bath tubs, shower stalls, pool tile and other acid-resistant surfaces use one-part WOW! Grout Cleaner diluted with three parts cold water. Apply to a 2' x 2' area to grout seam only.
3. Allow to stand two to three minutes for product to penetrate. Agitate well with stiff fiber brush. Do not allow product to splash on nearby surfaces.
4. Rinse area thoroughly with clean water. If product is not rinsed thoroughly, grout residue may redeposit on tile causing a dull effect. Be sure to rinse any overspray from walls, sink or fixtures.
5. For heavily discolored grout, heavy soap scum, mildew stains and hard water deposits apply undiluted product with a sponge, brush or swab mop. Rinse thoroughly with fresh water. Allow grout lines to air dry to view full restorative effect. Do not use area until dry.
